Dear Mrs. Myers

Thanks for the Morton pamphlet, most interesting. 'Tis the Letheon one I wish particularly; and have you not in the cellar the B. M. & Surg. Jr. for 1846? I should like the 1847 vol. also. They must tons of duplicates at the B.M. Lib. Attack dear Dr. Brigham for me. I should like the list you mention (a list of periodical publications which appeared at the time of the discovery of ether). And I lack Dr. Bigelow's original papers. I have not yet been able to get a Brit. Ency. with the Simpson art.; it will turn up soon, and I will send my Anaesthesia scheme when ready.

Tell . . . boy to hurry over. We need help. I shall hope to see him. Did you get my book-worm article?

Sincerely yours,
Wm. Osler.
