Dear Shattuck,

Indus-
trial
Medicine.

So glad to have yours of Jan. 2. By this time George will have reached home, and you will have had first-hand accounts of the family. I wrote the other day and told you of his generosity. I am spending the money with great pleasure and profit. Send me full details, when they are ready, of the Indust. School of Industrial Medicine as I am Chairman of a Committee dealing with a department to be organised in S. Wales on that subject. Send me the first number of the journal. Greetings to you all.
