

CUS417/127.87

From Dr. Malloch's Journal.
Monday, Feb. 10, 1919.

Saw Alex. Cruickshank Houston's dedication to W.O. in his new book "Rural Water Supplies and their Purification". "This little book is with permission dedicated by the writer to Sir William Osler, Bt., M.D., F.R.S., F.R.C.P. (Eng.) Regius Professor of Medicine, Oxford University in appreciation of his invaluable services to Medicine, his high literary gifts and his unaffected manners and sunny generous disposition, qualities which attract his many friends as forcibly as open spaces, green fields and pleasant waters appeal to lovers of the country."
