Feb. 10.

To Sir Edward Kemp.

Post-graduate instruction.

I do hope the scheme for Post-graduates' instruction to selected men of the C.A.M.C. will go through. Very many, even of the best, have in the four years lost touch with the details of civil medicine and surgery - others are anxious to take up specialities, but it seems only just to give these men a chance to add to their brain capital. ✓
