March 6.

(From Miss Smart's notebook)

A medi-  
cal point

To Dr. Fred Wise, N.Y.

I was much interested in your cases of multiple endothelioma in the A.J.M.S. Have you had an opportunity to examine histologically the multiple hereditary telangiectasis, some of which form extraordinary tumours.

March 6.

To A.G.B. Claxton, Esq., K.C., Montreal.

CUS417/127.159

I will look up B. at once and we shall be delighted to do anything for him should he come to Oxford. Of course I remember you perfectly well, and your dear old father who was always so kind to me.
