

May 8. CUS 917/128.64

Dr. H. V. Ogden, Milwaukee.

Enceph-
alitis.

I am greatly interested to hear your experiments with the encephalitis, and the outbreak in the U.S. seems to have been more severe than it was here where the cases have practically disappeared... I am asking MacNalty to send you his report which will give you the English experiments. It's a very remarkable disease and many of the cases have an extraordinary resemblance to the Heine-Medin...
