N.B.

I should say this drawing was by James Forbes (ca. 1769), at all events there is an almost exact copy of it in Forbes's Oriental Memoirs, 1813, Vol. I, and possibly it occurs also in the 2nd. edition, revised by his daughter the Countess de Montalembert and published in 1834, which edition is not in any McGill library at this date and cannot therefore be referred to.
