Sunday. May 2nd/07.

My Dear Edward.

I hope you were not startled
to get my last scrap - I
am still waiting for the cable
if it does not come by Tuesday
I am to go on Saturday, what
a fearful rush it will be.

I want to go ^(to Europe) very badly but
I'm afraid I shall be
dreadfully home sick (and
perhaps seasick (which would
be almost worse.) -

It would have been so
very much nicer if I could
have seen you before I left

But some nasty unseen power
has decided differently, so I
will try to be "his contente."

But Edward you simply will
have to come to Montreal the
minute I get back (September)

I think it most probable
that I will go but perhaps
I will not - If I do I
sail right to Havre² in France
then I go to Paris for two
weeks, from where I may take
little side trips. Then
I will go to London & then
to some sea side place to
stay with my aunt - and

3.

on my way back I will
take in Liverpool & several
other places. of course I
should love to go all over,
to Italy etc. but I must
not be greedy - I'm
sure you need a change
of air why not come to.
I would like to take every
body, it would be so much
more fun -

You ask me if I knew
of your intended trip to ~~London~~
→ Montreal.
Naomi said something about it
once, but I thought there could
not be much in it as you

4.

had never said anything to me about it - a surprise would have been beautiful though -

but two small plays are coming off on Tuesday I hope they will be a success. I cannot do my part in Soap - but that can't be helped.

I wish you could have been here for the opening of the Engineering building it was such fun - Everything in the building was open to anyone to see. The machines dynamos and all such things were working then they had a dance and a concert - I'm afraid I missed the concert - They also

Mrs.

If I go to England - the
 "Corinthian" (our steamer)
 will be the first one to
 go down the gulf -

Please remember to
 write me dozens of letters
 because I will be very
 lonely -

If you come to Montreal
 within the next few
 weeks, I'm sure you
 will find the tea at
 "295" just as warm
 as ever, but you will

7.

only find a little Hampton's
mother & Eva. Something
like the story of the 10 little
Niggers - only I left I wonder
what will happen to Eva?

Well I really must
stop - for this is a long
and tedious letter, and
you like scraps so
much better.

great deal of love
from your
"Aunt Sybil"
