

Shows the
great attending
doctors & three days

295 - Wednesday
Sunday 9/24

Dearest Cor,

I wrote you a very hurried line yesterday, & you must further explain, on Friday Ruth's toe was still tender & I said she must keep quiet & rest it, so she did, & after dinner Eric went out for a drive with Aunt Lucy & I sat beside her till half past 3 - when I went down to receive Eric & then Mrs Baynes & Miss Fairley came in just - as she was going Cor told me in a low whisper that Ruth was "howling with a pain in her stomach" I ran up to find Ruth in agony of pain, sick at her stomach, & had been so for an hour, & could not let me know, secretly I saw how she was telephoned for Dr. Brown, he was

3 tissues. For the road if we receive symptoms in our throat, or that he has the virus specifically influenced, usually today is proved. I have seen if the contents of old milk the business of all immediate changes with he over. I think will only be case for few days. The work very well today & complain of being harassed as much & less water is able than before. I think I see small quantities - the last balance of that we see a red ornament, I see very few specimens which has been analyzed, however, all the antibodies in milk are not necessary need to give us the clear and free the name of the bottle for 1 drop of milk has to be the reason of the change of cases to that the case is having a effect on the milk on respiratory & they would expect, many of cases

out - & I went down for father
in telephone par 4 or 5 doctors
all, out - & finally Dr Brown
arrived a little after 5 - & by
that time with great diffi-
culty we had got k'o' thing
off - mustard on - & hot water
to her feet - Dr B - looked very
grave & when we left the
room told us he feared it was
Appendicitis that name of barrow
I had thought - so myself -
In any case he & Dr Shepherd
came off later in the evening
& said a nurse must be
had, & if not - decidedly in-
formedly morning he would
to operate - got a first class
nurse who was to arrive next
morning, & I was with her
all night - puncturing & soothing
at night about 2 hours, which
was better than we had
hoped & had nothing but span-
ful of water - nurse arrived
Saturday, a nice kind woman
& Brown came in twice & Dr

that is further on. I don't know either
I shall like to know as the same
need to get up. I will have my logs in
the morning. I don't know how long it
that must be in your case at least
now the fuel comes as I expect over the
a day - the day not - have to get the
now it is gone except a little fuel
I think you had better be sure to
have fuel all once I don't try to see
don't - you? It is what the
has their road. I think with that
house - but that is a little
comes up twice a week I think it
were at - a narrow all
the board's table after
some with things Baker for
is in well - that I want I had as

as the nurse, who can sit
down peacefully & make
both sleep, or read to her.
I have so much more to do
with Eric, & then see to her
meals & so on. Ada had
wild ideas of what ought
to go up to her level - even
it is settled a little. Ada
has been most obliging &
willing, & kind. I am for-
getting about the dust &
dirt, especially as Esther
has thoroughly cleaned
my room, & the hall &
stairs & altered the stair
carpet.

You keep well my love
& happy - the whole activity
I trust - is now over.

Lois gave a long wild look
at the nurse, & flew - to reap-
pear in a minute with her
nurse's pink, & which she
shyly held out to the real
nurse.

Was it not funny -
Love to Auntie Vall
I tell much will I am
not purposely contracting
a sequel to Job -

We must follow where
the Lord leads - I do have
thankful I was to feel that
perhaps if she had had to
suddenly cross the river
ever ready - we need to
watch & pray as those who
wait - just as much for
life as for death, more

Loveingly dear
Mother

Aunt Laura came down
well, to see Eric, went back
Thursday.

Mrs B - says she has not
forgotten you, but as you
may imagine she has had plenty
of running, & the telephone
must be weary -
