

any things that  
interest you for  
cannot receive  
buying West Coast  
& there are no end  
of them on all  
hands - We intended  
to go around 2.4 on  
the automobile  
backlog but were  
stated by the  
have the things  
had been altered.

We were sorry for  
the day was sunny  
& like a very summer.  
& they very racing for  
contacted  
Do be a good &  
helpful had I miss  
and every hour my  
clear later some  
another

Part earlier - make separate  
New York, aquarium copy.

Yesterday we

went to the aquarium. We had  
to go on the elevated railway  
a long way & then we found  
ourselves at the very end of  
New York the sea washing up  
to Battery Park - The aquarium  
was a large stone building &  
many people were going in  
especially poor & common people  
for there is no charge - Inside  
we found ourselves in a  
great round hall with

with great tanks in the  
floor - not deep - but large  
in one a crocodile, another  
an alligator, a 3<sup>d</sup> some big  
turtle & turtles - a fourth was  
full of big sea fish skates &  
sculpins & huge cod & other  
fish, & so on. Then all  
round the walls were big  
windows, as panes of glass  
with water & fish behind  
them. Every kind - gold &  
silver fish - star fish - big  
fishes & eels & was was were  
slithering, darting fishling  
I saw one exactly like the one  
I saw on the wall at Inlet  
in my room - & we saw large  
angel fish - & round & thin  
& long & fat. The lobsters look  
fine just draped over rocks  
& thinking - Some fish just  
perched on the rocks as birds  
do on trees - & I never knew

before that I felt not well their eyes but  
they can't if each so very sad &  
independent - I had no other they  
just were so wonderful by the way  
every bit of their hands & other things  
just washed like. I wish like also  
sawing & some will be used & they  
like their on the - we will be  
not - may be useful as wonderful  
I that his words is was his wonderful  
words describe " the whole world  
full of wonders - they are always  
around people for that - I on the  
why I have a few with people they  
are so beautiful - I so and of God's  
works we cannot understand them  
easily - maybe we were at the last  
bit - men & low more things  
things - very beautiful minerals, &

success shows - & some very strong  
concerns? others from Mexico - on the  
east - living mud was so extensive &  
shows their great power. There was  
on very coarse like that of great  
others with holes and - & a great  
green for a color of the flowers  
I could not know why it was called  
that - being abundant of their color  
people used them the wheels of their  
& gold - and of their mud like  
like that of a pebble as far as  
but on river and mud as far as  
a clean white ring - the long ago  
men & men taking the water always  
very long, being making things  
of labor nature of things that  
works very fast, & in of water that  
very little chance of use of these are
