

Letter to  
Dr White Williams  
3

Pictou N Scotia Apr<sup>e</sup>  
1847

My dear sir  
Your letter of  
July last arrived when  
I was absent in Brit<sup>n</sup>  
air - otherwise I would  
have answered it long  
since. I have put up  
a small parcel of  
Fossils and Minerals  
and have forwarded  
it to the care of Messrs

A Beech & Co North  
Market St Boston.

The minerals men-  
tioned in your letter  
would be useful to me,  
especially, Analcrite, Coe-  
sinite, Or Chrome, Mala-  
chite & Pyrite. Good Green  
& Hyacinth. The fossils from  
the west would also be  
interesting. I have indeed  
very few specimens of the  
minerals & fossils of Pennsyl-  
vania Ohio &c.

A parcel forwarded

to Mr Beech would be  
pretty sure to reach me

With best wishes

I am yours truly  
J. W. Dawson
