

Letter  
Lyell  
1847

My dear Sir

Before I leave London  
for the country, I will write to  
tell you that your paper on the  
Red & L. Blomfield was read  
at the last (2 a very full) meet-  
ing of the G.S. & was explained by  
me as fully as I could for there  
was much other matter before  
us - Indeed it has been a  
crowded session for papers - Your  
memoir was referred & ordered  
no doubt to be printed during the  
vacation - I have not had  
time to get your Selection  
thoroughly carefully examined yet

but the Artisia La went to  
C. Bumbury after being exhibited  
Your enlarged sections answered  
it very well but I wiped  
off much, when queries were  
put to me.

I am glad they have elected  
you member of the Acad. Nat  
Sci. Philad.

I hope you will let us  
hear if the Sea serpent or  
any other extraordinary visitor  
should visit you in Nova  
Scotia or any great dis-  
covery come to light -  
Mr R. Brown has

sent us a paper & from  
the Stegomeria is the  
root of Lepidodendron.  
It is shown in C. Bartsch's  
selection.

With my congratulations  
on your marriage  
Believe me

Yours  
sincerely  
Chas Lyell
