 except the
 gape moderate.
 to about half
 way and
 part of the
 dorsal plates
 for angle many
 below the
 at superior part =

3. Ventrals have also each eye
 smaller like ear.
 on the acipet the short
 rays - convex lateral shelves
 edge of spine & trunk the large two
 curved upwards
 small or
 many sharp
 part of

11 rays the two lower soft and scapular.
 Ventrals consist each of a stout spine
 sheathed many to the point in the subsequent
 below lower by narrow and pointed a
 short stout & with a thin transparent
 membrane, reaching many to the point,
 Posterior for anterior spine shorter. This
 when develops inserted in the dorsal groove.
 Second dorsal of ten soft rays second
 and third equal the upper dorsal part
 for the first many the form of a serrated

Gastroteus gymnes

Body prominent

Length two inches — head & body as 1 to 4, depth of body to length as 1 to 4. ^{From slightly compressed especially} ^{above} head ^{from} ^{slightly} ^{compressed} ^{especially} ^{above} ^{head} ^{upward} ^{conical} ^{except} ^{the} ^{lips} ^{fringed} ^{by} ^{long} ^{fine} ^{setae} ^{moderate}.
 Eye prominent diameter to ^{about} ^{half} ^{way} ^{between} ^{eye} ^{and} ^{pre-maxillary} ^{and} ^{on} ^a ^{level} ^{with} ^{the} ^{upper} ^{part} ^{of} ^{the} ^{orbit}. ^{Body} ^{entirely} ^{unspotted} ^{of} ^{plates}.
 Operculum ^{is} ^{from} ^{view} ^{of} ^a ^{right} ^{angle} ^{round} ^{at} ^{apex}. ^{Operculum} ^{rounded} ^{below} ^{the} ^{near} ^{sharp} ^{above} ^{rounded} ^{at} ^{superior} ^{part} ^{an} ^{angle}. ^{Sub operculum}

Branchioid rays three.

In the oper. - does not vary with

3 Branchioid rays also each eye

1 smaller like each eye on the acipenser the above

Coarctation - covers lateral sides at edge of oper. & thick two large rays

Scapular rays ^{not} ^{present} ^{or} ^{separately} ^{from} ^{the} ^{oper.}

Pectoral broad ^{near} ^{sharp} ^{above} ^{rounded} ^{below}, ^{composed} ^{of} ¹¹ ^{rays} ^{the} ^{two} ^{inner} ^{soft} ^{and} ^{sculp}.

Ventrals ^{consist} ^{each} ^{of} ^a ^{short} ^{spine} ^{sheathed} ^{near} ^{to} ^{the} ^{point} ⁱⁿ ^{the} ^{conjunction} ^{between} ^{the} ^{two} ^{inner} ^{rays} ^{and} ^{joined} ^{to} ^a ^{short} ^{stout} ^{rod} ^{with} ^a ^{thin} ^{translucent} ^{membrane}, ^{reaching} ^{near} ^{to} ^{the} ^{point}.

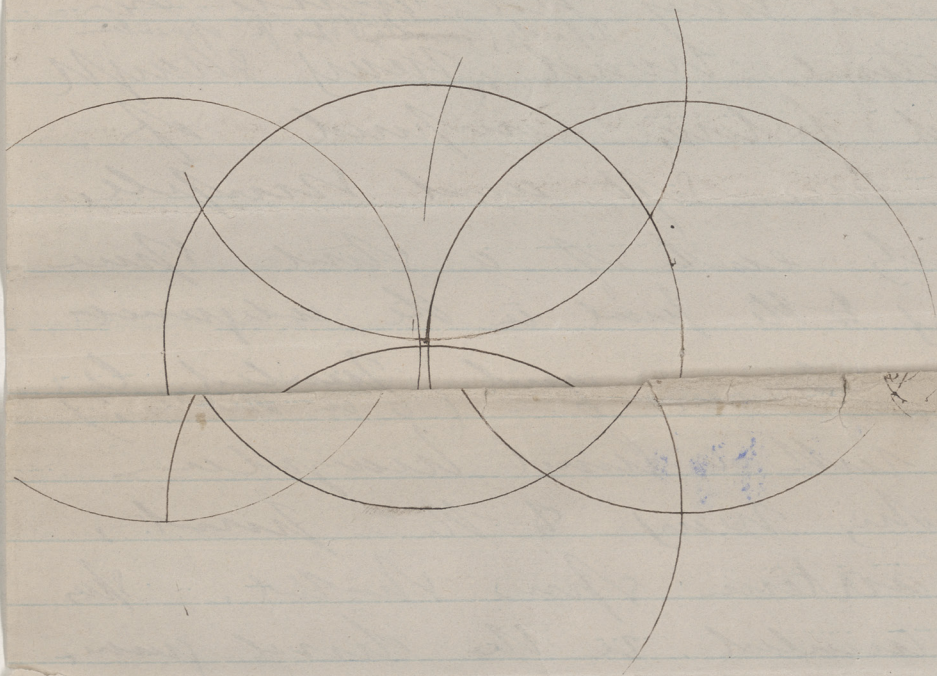

Pelvic ^{spine} ^{short}, ^{spine} ^{short}, ^{spine} ^{short}, ^{spine} ^{short}, ^{spine} ^{short}.

when ^{departs} ^{inserted} ⁱⁿ ^{the} ^{dorsal} ^{groove}. ^{Second} ^{dorsal} ^{of} ^{ten} ^{soft} ^{rays} ^{second} ^{and} ^{third} ^{eyes} ^{the} ^{upper} ^{dorsal} ^{part} ^{of} ^{the} ^{for} ^{the} ^{for} ^{view} ^{the} ^{form} ^{of} ^a ^{sculp}.

Triangle, Area for with the details
curved membrane spine in front.
In for number to Area for let layer
and with 10 rays.

Find Area for spine color correction
of pattern, but also beginning of Area,

Color also Area green with dark
mylar sheets, absolute zero
and Area part of full cross front
page. Whole leaf dotted with small
black spots - necessary in coloring
when executed so as to give a green
dark color, check under the
finger.
