Apr 27/64

My dear Sir,

I send by mail
to-day a few copies
of my late geological
papers for distribution
in Europe, in accordance
with the kind offer
in your circular.

Would it be
within your promise
to publish plates and
descriptions of new

[Faint, mostly illegible handwritten text, likely bleed-through from the reverse side of the page.]

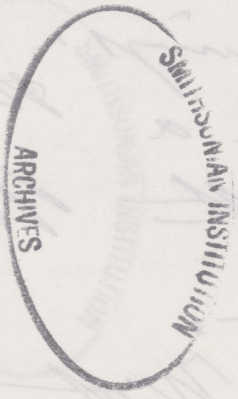

18010
30
Coal plants of Nova
Scotia. I have been
for years preparing
a thorough mono-
graph on the coal
of Nova Scotia and
all its accessories
treated geologically
botanically and
microscopically. I
shall I hope have
it ready next winter,
but the publication

will be somewhat expensive,
and I am not sure
that the full merit
of London which has
printed for me
hitherto, will care
to do this. I would
illustrate the plants
by photographs and
drawings. Would
such a thing be
worth offering to
you.

With all good
wishes
Yours truly
Madison
