

Great Western Hotel  
Paddington London W  
7 January 1865

My dear Darwin

Send you a proof of your  
paper of Dr Carpenter.

Typographical errors have not  
been corrected; but you will be  
able to read through them.

See too that the paragraph  
you sent me about the aid  
derived from Dr Carpenter  
which has been omitted. This  
is through the inadvertence  
of the Secretary of the Society.  
Huxley put it into his hands,

in fact the day I received it.  
I shall see the secretary to day  
about it.

I think you will be satisfied  
with what Dr Laporte has said.  
I had facted with him yesterday.  
He told me he would take care  
to ~~not~~ obviate any accidental  
discrepancies that there might  
be between his & your papers.  
Of course he considers the  
Mammalian structure an  
additional fact which,  
he has been able to  
more fully understand

from the Superior Character  
of the specimens submitted  
to him. There were all  
from the <sup>large block</sup> ~~specimens~~ which  
was brought from the Signory  
of the petite nation after  
some examinations were  
closed and of which  
block <sup>(transparent or opaque)</sup> no slices were prepared  
for the microscope in Canada.

Yours truly  
R. E. Logan
