

Letter to
Royal Society
July 1864

Sir

I beg to present to you
the following
statement of the Council of
the Royal Society

I have now in
my paper a collection
numbered from 1 to 100
of specimens of several
plants for 80 or 90
years, and including
some unpublished specimens
and very large and
perfect examples of
this genus which has

Improvement of
We I think that
considering the simple
of the original plan
and the fact that
whole very no very
open as the paper
shown no adequate
Merits the fact
perhaps there is
fact is the fact found
be very much of
share payments, but
very much that
they should be in
adequate Merits
great things for

From the paper a man
sent me the bundle
was 2 lbs of wet
stuff of about 10 to
12 pages and I
found the end of the
A.S. with good days
a photograph of the
most perfect specimens
obtained. If the bones
will withstand I'll
the expense of 10
10 or 12 printed plates
of illustrations.

As the large collection
contains many very

hands and report
just out of papers
by one of the persons
I will be glad of any
attempt to be made to
the agents of the

Journal of course
understand that the
offer made by the
will be entered in the
appendix of the
Fuller's note when
actually submitted

of the
of the
