

Department of Mines,

Chief Commissioner's Office,

Halifax, N. S.

Oct. 14: 1868

Dear Sir My time has been  
so occupied during the  
last few days with  
Exhibition matters, that  
I have not had leisure  
to soon acknowledge  
the receipt of yours of  
the 2<sup>d</sup> inst. —

Your prompt explanation  
of the statement in ques-  
tion, and your proposal  
to insert a correction in  
your sheet of corrigenda

are quite satisfactory.

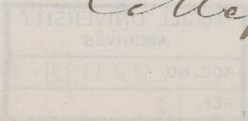

The general section was taken by Mr. Stain who states in reply to my inquiry relative to your statement that "the measurements of the seams at the Montreal Section (Cly. were made at right angles to the lie of the strata, and not vertically". These measurements I of course verified as far as I was able at the time. I think a statement to the effect that the thickness given in the section are the true or

geological thickness of  
the seams, will be  
sufficient to correct  
the misapprehension  
which I fear the state  
- went as it stands at  
present is apt to give  
rise to -

I am  
Yours truly  
Thos. Rutherford

D. Dawson

P.S. Would you please run  
with a copy of your  
College Calendar.

Rutherford  
all/18
