Prof. Dawson

Dear Sir,

I wish to obtain some information about the glacial drift north of the Laurentian Mts. Can you give or procure for me answers to the following questions?

1. Is the drift action evident over that whole region?
2. Has it left much clay, boulders or other debris, or are the ~~clay~~ bed rocks swept pretty clean?
3. Any other points that may be communicated will be of use to use. If you can help me in this matter ~~I shall~~ either directly or by referring me to any person who can answer my queries, I shall be under

E. Andrews
great obligations to you.
Your obt Servt.
