

329 St. Antoine St.

Montreal Feb 8/70

My dear Dr. Dawson

I am sending you with this a couple of curiosities from South America which you may perhaps think worth adding to the College Collection although they have been sadly knocked to pieces in travelling about.

They were dug up in the construction of the Great Southern Railway, some 50 miles south of Queen's Agnes, near the "Lamborombon" River and about 50 miles from the "Salado" where Sir Goodtime

Perish made his great discoveries

I would have extended the excavations and might have been able to add something valuable to the College Museum but the Government would not have allowed me to take any such specimens out of the country so I did not care to go to the expense for their benefit and therefore cannot say what more was to be found in the neighborhood

I will call on you as soon as I can find time to answer any questions you may wish to ask

about these

Yours sincerely  
William Crawford
