~~SUNDAY AT HOME,~~

56, PATERNOSTER ROW, E. C.

London June 17 1880

My dear Sir

The programme
of the geological papers
is excellent. It would
be better to make a
few more articles,
still completing the
synopsis within the year.
Four of the months
of the year have five

weekly numbers, and
by giving in these months
two papers, you could
have sixteen pictures
as you propose. Be
as scientific as you
like, but as popular
in statement as possible.
Faraday was the beau
ideal of this, even
in the most lofty subjects.
Try to interest as well

or instruct us. But
I think you understand
this.

The Sunday papers are
also what I wish; but
it might not be
prudent to run
both courses parallel.
Therefore can no time
is given the geological
first. The others can
follow at your leisure.
The two would together

^{Macaulay}
make a valuable work,
which I trust you will
hereafter give the
Tract Society the
refusal of for
separate publication.

Yours truly
James Macaulay
M.D. Edin.

To Rev. D. Dawson.
