

Albany Aug. 12 1880

My dear Sir

I have received

Your favor of the 6<sup>th</sup> -

I do not need the  
plant for the Association  
as I have this - I shall

exhibit the stamps &

some large slabs in  
connection with

some remarks on the  
gradual encroachment  
of land etc -

Do you regard the  
large trunk as Maroon  
- or will it differ enough  
to make a new genus?

- please expect your  
packer to more care  
in packing - One bottle

occasions the plants  
returned to me have  
been badly broken  
- Saw Dyer is safer  
than paper alone unless  
the specimens are packed  
by an expert.

I have been getting the  
things from the same  
locality - and also  
much from the  
Itasca locality - probably  
not many new things, but  
still some things of interest  
- I cannot agree to the  
little fern yet.

I am very truly yours  
James Hall
