

Cambridge, Mass.,

Nov. 3rd, 1870.

Dr. Dawson,

As I am now engaged giving a course of lectures, in the Museum of Comp. Zoology, on the Geology of Mass., & as I understand you have examined the Eozoin Limestone from Chelmsford, near Lowell, I naturally desire to learn in regard to the result of your examination.

If, in few words, you will write giving the result of your investigation, you will greatly oblige me.

You have made, as I suppose, microscopic sections. If you have not material enough, I can readily make arrangements by which you can be supplied.

In case you can furnish me with a prepared section, you will please inform me to that effect.

Trusting that I shall soon hear from you, I am,  
Yours, very truly,

John B. Perry.

Prof Benz

Dr. B. Benz

As a soon was engaged during  
a course of lectures in the Museum of  
Zoology, on the subject of Masses, I as  
understand you have examined the  
specimens from Chelmsford, near  
I originally desire to have in regard to  
the result of your examination  
If, in few words, you will write giving  
the result of your investigation, you  
will greatly oblige me.  
The hour would be 8 o'clock, Thurs-  
day, 22nd. I have not yet received  
any reply, I can readily write answers  
which by which you can be supplied.  
In case you can furnish me with a  
proposed edition, you will please inform me  
to that effect.
