New York, July 16th 1871

Prof. J. W. Dawson

My dear Sir

Your notes on
the Galton plants came
this morning —

Your former letter came
while I was sick with
Cholera. I soon after went
to Ohio, and came back
last week. The first thing
— almost — that I did after
my arrival was to pack
up all my botanical
plants. I send you
for examination — but
I have delayed for-
warding the box till
some other of our little

Ohio Geol. Rept. which
I am to send you. Should
arrive - Shall not
wait longer however, but
shall send the box
tomorrow - I have named
the species, & send you
& shall figure & describe
them in my next report
on the Geology of Ohio to
be presented next month.

As soon as you have
examined the specimens
sent I will beg you to
return them as I want
drawings made from them
for my report -

Hoping it will be a satisf-
action to you to have seen
all the known Devonian plants
of America - I am

Yours truly
J. S. Newberry
