

School of Mines, Columbia College,

CORNER 49TH STREET & 4TH AVENUE,

New York, July 30th 1871

Principal, J. M. Dawson

My Dear Sir

I thank you
very sincerely for your
interesting letter, and
for the notes on the Iron
furnace, which has been
returned. I shall be
under great obligations
for any notes you may
find time to give me
on the Devonian plants
sent you, and shall take
pleasure in giving you
credit for any lights you
may be able to throw
on structural & affinities

I am just now wholly
absorbed in Devonian
fishes, but shall get
back onto plants before
long —

I have some strange
things on fishes. Among
other things, some large
small mottled Chemosoids,
one genus I only allude
to Ichthyodon. The
teeth nearly as large
Another with teeth
playing on each other
like the blades of shears
teeth sharp cutting

Edges.

Then I have been
putting up labels, and
shall tell the public
something about
them soon

I shall send you
my first report
in a day or two

Your very truly
A. Newberry
