

Sydney, Cape Breton Island  
Nova Scotia.

March 10<sup>th</sup> 41.

My dear Dr. Dawson,

I must beg you will excuse  
an intrusion upon your time, & the favour I ask  
of you just now. I have seen extracts  
of a Lecture delivered by you - Subject - "Im-  
-pressions made on your mind during your recent  
-visit to England." I presume the Lecture is pub-  
-lished - but the party writing on the subject of  
"Religion & Science" Dr. Cramp. does not indi-  
-cate where the Lecture can be obtained. I should  
-much like to get it if possible - but have no  
-means except by applying to you, or far at least  
as appears, of obtaining it.

If you can supply it to me I will gladly  
& thankfully forward the price & postage by Mail.

I am very thankful to find you  
as an acknowledged scientific man  
your influence also, as a Christian on  
the side of vital religion. Espe

This both useful & pleasing to all lovers of truth.

I have your work "Archaia" - date 1860.  
by me, & find it both useful & profitable; and  
I pray God your life & health may be preserved  
& render much more useful information  
on many subjects - to the world - whether in  
the walks of Science or Religion.

You may scarcely remember that I had  
the pleasure to call on you last September  
just as you were going to meet Mrs Dawson  
on her way out from England.

I afterwards met your Lady & Miss  
Dawson, at a Meeting on the Lord's Day.

May I ask you kindly to remember me  
to your Lady & daughter - also to your son  
who very kindly went over the Collyer with me.

With much respect & kindest  
Subscribes -

Dear Dr. Dawson

Yours in kindest regards

J. F. Kendall.
