

Montreal.

21st June 1871

Dr. Dawson,

He He

McGill College
Dear Sir.

I think I was in error when I stated Mr. Rutherford J^r of M^o. had alluded to the "Gardener" as a 5 foot Seam - in his Annual Report. It was in a "Paper" written by him & read before the N. of C. I. of M^o. & M^o. En^o. that he speaks of it as being 5 feet thick. I send a Copy of the paper Vide page 39. Mr. Moseley some time since informed me the Seam had thickened according to the dip - in writing me last April he says "the Gardener Seam is 5 feet thick as measured in the last workings" As parties attach much importance to thickness as well as quality - I thought it not out of place to respectfully submit above statements - as the

openings on the seam have been
much extended since your visit.

I enclose Cheque for Fifty Dollars &
Remain

Dear Sir.

Very truly Yours.

Joseph B. Moore.
