

Museum of Comparative Zoology,

AT HARVARD COLLEGE,

CAMBRIDGE, MASS.

Feb 22/72

My dear Sir

On writing to Mr. Desguereux as to condition
in which he left the fossil plants of the Museum
he writes me that every thing was left just as he
wished at it & that unless he were in Cambridge
himself and could see that every thing was upland
in the exact position it now has he would lose a
good deal of time in resuming his work. He comes &
goes constantly working here & there as he can find
time from his other duties & if you could arrange
with Mr. Desguereux to time your visit to Cambridge
when he is at work he would be very glad to show you
every thing which may be of interest to you in his Dept.

Yours truly

Alfred Russel Wallace

at last advises the "Hassler" had left Pernambuco for
Rio and the only attempt made at dredging off
Barbados was wonderfully successful in way of
Crinoids of which the haul was marvellous but
further details there are not at yet
