

Blanchard June 4 - 1872

Dr Dawson

After you left
here on Saturday last
I found the Iron $\frac{1}{2}$
mile to the east of
the red slate rock at
the opening of the old
Clearing I enclose a small
specimen I found a ledge of
the small piece enclosed and
the ground is deeply colored
with the mineral the grey
rock is abundant all round
the spot where I found the
enclosed the Iron ledge is
visible $\frac{3}{4}$ mile to the south

of John McDonald's barn
on the lands of D. M. D
& P. S. Campbell should
you wish for larger specimens
I will attend to your wish
address Jas McDonald

St Paul. W. C

New Glasgow
yours respectfully

To Dr. Dawson } James McDonald
