

Montreal June 25/42

Sir,

Having rec<sup>d</sup> an inquiry from  
some friends in England, as to  
whether we can furnish them with  
samples of magnetic iron ore; we  
venture to apply to you for  
information as to whether such  
a mineral is found & worked in  
this country, & if so where they  
would be likely to get samples  
of it.

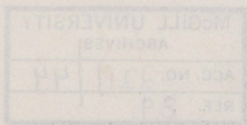

Our friends also speak of  
Manganese phosphates, by which  
we presume they allude to Manganese  
ore, such as is found in New  
Brunswick?

Apologizing for troubling

you in this matter  
are remaining
