

Cly & Brewster

July 17/72

McGill College,
Montreal.

July 17/72

My dear Sir,

The only prints
in late letters & telegrams
concerning reply are I think
the following.

1. A & Spurr are
samples. I have telegraphed
& inquired & inquire and
have send a smaller
sample direct by express
from here.

2. A & Grant are
his respective & fine
deposite figures the
than comparative. You
may state them
thus:—

No 1. Spathe Lestimate
of muller ^{of muller} two & half
acrefille - Quantities
beyond this indefinite
but probably large

No 2 ^{Remittance} Absolute unlimited
No one living can
see this bed except
painted by any
amount of extraction
In way say anything
for ten millions
of tons to 100.

No 3 Specular and
No 4 Limestone - I
will state there

to me

at four millions of
tons each available
and an indefinite
quantity beyond,

Refer to the
rest to me; but
these quantities are
small supplements only,
We are asking for that
a cent a ton for the
one which can be got
by sea superphosphate
and nothing for that
which will require
deep ~~driving~~ ~~mining~~

Still we are
wishing to push
and of the whole of
to be the same

Invention by the
of the letter, his super
Dunham's study which from
the study that of the
Perry's address at the school
of the he heard ready to go
out to Park with a way
files also in my the
entire the study process
the other end of the
Council in the whole
the case and small
part of the steps we
go to present us and
of the set back for the
select of the of your
and in which aspect
of our we will be
then to take any being
the very often I have
but never the show
part is of the and the
us of us of the study of
at the school
