

M. Gill College,
Montreal.

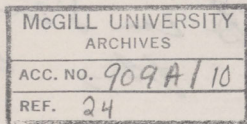

Sept 27/72

My dear Sir,

I enclose in
this the tracing of
the Sutherland's River
lots. My reason for
making it was to
answer some questions
of Pentre about
the lots actually de-
cided. There are
two points on which
I feel uneasy
(1) on the plan

The road and the
cup of the ne-
seem very near
the North line
of the meadow
lot which would
give us very little
hold of the
^{as it dips to the west}
bed - I was under
the impression that
the lot extended
a good way to

the North of the river
Please see how this
is - It certainly differs
from what I was
told on the ground.
If the plan is right we ought to
have fewer of the veins
(2) openings than the
extension of the bed
to the west, we shall
certainly want them
front lot, and I
would authorize you
to offer not more

Copy to
H. Primmer
Sept 22

\$500 to him in
my account for
his mineral rights
of ferge thinks them
likely to be of value
and they can be had
ferret to Primmer in
his copy a receipt
land him to Primmer
We when the camp
has been ferret,
Please attend to this
at once taking steps and
us as I fear that the
sects my to take a step
to in such lands in
the defects.
