

A Cook

Lubbock 14th Nov. 1872

Dear Sir

My idea was to have
the lectures extended over
December, January, February and
March, with an interval of a fortnight
at Christmas - and say, three lectures
in the week. But if Mr Dawson can
be induced to undertake the work,
we must and will be guided by what
it is convenient for him to do, and
by what he thinks best to be done.
I would like him to take both
Chemistry and Geology & Mineralogy -
both courses to be fundamental &
popular, - such as I should suppose he
would have no difficulty in giving.
Society is to join our Literary
Classes - But it seems he knows nothing

of Latin & Greek in the philosophy of
the 17th & 18th century. The first subject
of study in the Theological College of
Montreal. Believe me

Dear Sir

Very truly yours

John Cook

Principal Dawson

Yours
