

M<sup>c</sup>Gill College.  
Montreal.

July 22, 1843

My dear Sir,

As I think it  
barely possible that it  
might be a matter of  
mutual interest to the  
proprietors of the Acadia  
and Pictou Iron Mines  
to combine their efforts  
in the working of these great  
deposits, I take the  
liberty of sending you  
the enclosed

I may state that  
I consider the deposits

nos 3 & 4 of the colored  
Memorandum to be the  
precise equivalents of  
the cecidia I've seen  
both in extent and  
quality of ones. Those  
marked nos 1 & 2  
have no peculiar  
parallel at ~~London~~  
the cecidia. I can say  
this with confidence  
having studied both the  
parts from their first  
discovery and being per-  
haps better acquainted  
with their capabilities

than any other person

Mr. E. A. Prentiss is  
alone hands the Papers  
departs at present as  
has I believe completed  
a year so his arrangements  
in England or Scotland  
and so soon as he  
returns there he has  
has a share ~~that~~ I shall  
be free to do about  
I can ~~to~~ aid ~~at~~ <sup>either on</sup> ~~the~~  
there <sup>as so far as sending up much of what is necessary</sup> ~~and~~  
shall be happy ~~to~~  
do so in the interest  
of my native ~~Country~~
