Walsgrave Conservative Club,
S. W.

22 Oct. 1873

Dear Sir

I have yours of 9th inst. informing me of Mr Carmichael's exploration to the North of my area. But what follows I cannot decipher. It would seem

that instead of the "whole" or "nearly the whole" of the Iron deposits of Pictou being within my area, that I have but a very small portion thereof.

What with Carmichael Hudson, Giles, Heatherington

Dear Sir

Geo Stephen, Ellenhausen
Dr. Wind & in the
field, I will find it
hard to convince people of
the great value of my
property, particularly as
all of these gentlemen,
except Stephen, are
asking less than half of
what I have paid.

I see now my great error
in paying such a price
for my property, & I feel
acutely the narrow
& unfriendly nature of your
associates, who altho' they
have received it at my hands

\$42500. yet- hesitate to
risk a few hundred dollars
to prove the Limnite area.
Seeing that they have the
security of the property
they need not have hesitated
to plunge into this alarming
expenditure say (500\$) five
or six hundred dollars,
unless they consider the
property absolutely worthless.

I see this much, that
I can expect no help,
no consideration, & in the
event of any requiring time,
no mercy.

Will you advise me by
seeing that the lease, or
license, is renewed & if before

Primer will attend to
this for me. Mr. Prentice
gives to names & I will
request her to pay you
the necessary amount.

Yours faithfully
Edw. Al. Prentice

D. Dawson N.R.S.

P. S. When Mr. Potter calls

please be careful. He is
utterly unprincipled.

Tell him only of the great value
of my property, & that the
trainway required is only
10 or 12 miles. Speak only
of the geological facts, & their
value, & being ignorant of
any financial arrangements
