Boston Nov. 11. 1873

Dear Lesley

I send you a cutting from last evening's paper in which you will find shadowed forth some news in geology which will I think interest you. They are new to me and have come upon me with great force since I was in the Blue Ridge.

I got your postal card and thank

Nov 11 1873

[Faint, mostly illegible handwriting, likely bleed-through from the reverse side of the page.]

Carefully gone over your make
 report but as you say I want
 further information or look for
 the letter promised from Mr
 Crotch. It is now uncertain
 from the present disturbed state
 of the money-market whether
 I go South this fall. There
 will be little chance to do anything
 in the world of finance just
 now. I expect the affair will
 wait till the spring time.

I shall however be glad to get
 the letter when Mr. Crotch sends
 it and may be off in another
 week. If I pass by your
 way I shall certainly call
 on you. Please write me
 what you think of my geological
 speculations enclosed: whether
 you think them admissible

Always truly yours

J. Stern Hunt

Prof. J. P. Lesley.
