

Pictou 5th Jan'y 1874

D. Dawson

My dear Sir

I wrote to you some time ago that I had asked Donald Fraser to send you such information as he could, together with a sketch of work done, & discoveries made, on the iron ores at E. River last season.

I thought he had sent this to you but recd, this morning, the enclosed note and Plan which I hasten to forward at once to you.

Perhaps you are already in possession of this information but if not, I think you will find it important. I duly recd yours of

30th Ult^o and have applied for 2nd Right on 122 for the parties interested in the Cullen Area. 121.

Mr^{sr} Holmes is I think interested with Mr McRae in the 1st Right on 122. Perhaps it might be as

well to admit Mr. Rae to a
quarter interest in this area
and in that case it might be
examined the ensuing summer
- besides unless something like
this is done Mr. Rae may take
out his rule independantly of
us as Mr. Holmes, can give him
the necessary information.

(Yours very truly)
Howard Pinnow
