

Pictou 24 Jan'y 74

Dr Dawson

My Dear Sir

I duly rec^d yours of
13th Inst. and have asked Fraser
as to position of ore at Kennedys
and enclose his reply and a sketch
showing his idea of its situation
it appears very likely that a
part of this ore will be found on
137. & a part in 108. It is now
time to decide whether the intend-
ed mile to work which you have
marked on lot 45 is to be taken
out. It must be done previous to
20th proximo and will be at the
expense of the Montreal Coy^y pro-
vided Prentice fails to pay up.
It may be as well also to decide
now on the mile on area 101
surrounding License to work ^{8.} ~~108~~

Mr Holmes says it can be taken out on 101 as marked off in the Plan you sent me. Will also be at the Expense of the Montreal Coy if Prentice fails to pay up. This indeed applies to all the expenditure on the Montreal Coy's areas since Prentice made his payment.

We hope we shall hear before long what Prentice is doing & what his prospects are we shall feel anxious to get the first intimations regarding his movements.

Yours Truly
Howard Finmore
