REF. 19

McGill College.
Montreal.

July 3/74

My dear Sir

In answer
to yours of 2 - day
I may say that the
only discoveries of
what I write to
Mr Shury, consisted
in the tracing of
the Red Heron
bed in the area
between "Blanchards"
and East River. This
had evidently

anticipated, but the
bed was not
actually found
till Faxon and I
went on the ground
last spring. I regarded
it as of much im-
portance as being
thus in the north
ward of the Salt
River, and by
your request Com-

communicated the facts
to Mr Potter and
to Mr Shaul who
was acting for him.
I may also have men-
tioned to Mr Shaul
my further explanation
of the Semantics as
the "Cullen" case,
but I have no re-
membrance of doing
so.

You may com-
municate this to

C. D.
Reuter
for

Mr Hamilton, 74

I shall be here
on Wed. for Rumour
work, returning here
probably in a week
or a fortnight. I shall
then be able to
decide whether I can
do a new Section, which
may depend on the
intelligence I receive
as to some Coal and
Copper properties in which
my friends there are in-
terested, and also on my
engagements here. Yr affec-
tionate
W. D. A. W.
