

Montreal Sept 9 1874

Dear Sir

The opening up of the
lane will not incommode me
in the least. I do not need
the drain for any purpose of
my house. I am incommoded
by surface water from the
mountain in the spring. This
I do not see that the drain
will ~~be~~ help. I will no doubt
have to contribute to a drain
in the rear lane when it is
made and proportionately with
the other proprietors to your
drain when it is used.

If the surface water which

troubles we could be got rid
of by the drain in the law I
would have an interest in
it.

Yours truly
Samuel Dawson
