

Why

Lorne Brook Feb'y 15 1845

To Howard Primrose
Dear Sir

I purposed to write you sometime ago but deferred it thinking for to go to see you but owing to the inclemency of the weather I did not go - I purposed when the Iron work ceased for to write M^r Dawson a geological report of the position of the Rocks and all that was new in regard to the iron ore. But did not do so as I felt I might differ from M^r Gilpin's report and ^{might} do some hurt to the parties interested. There is much that is new learned last Summer, on the specular there is much information yet and much yet to be learned at the busters I consider that much information has come to light them. I leave this morning for New Glasgow as I requested M^r Copeland for to write you to get the use of some money

Yours

Donald Fraser
