

Pictou 29th March 1875

My Dear Sir

Logan wishes me to send you a core (which goes by parcel post by this mail. to your address) from the boring on Casibow Island. also the enclosed mem. of strata passed through and a sketch showing the place where they are boring marked with a red cross. The sketch is taken from Church's Map.

They wish me to say that you would confer a great favor if you would telegraph to me at their expense your opinion - on looking at the enclosed and the core sent herewith - whether it would be advisable to sink deeper or not. Please give the matter as early consideration as you conveniently can oblige

Yours very truly
Principal Dawson
St. Prinsboro

send the telegram "Collect" I will pay it here.
