

on F.M.D's
report

London 2 Oct. 1875.

Principal J. M. Dawson
 McGill College. Montreal.

Dear Sir,

I have to acknowledge
 the receipt of a copy of
 the Geological Report,
 which I have only had
 time to glance at.

I wish however to
 express to you &
 Mr. Dawson my hearty

congratulations on the
great "kudos" that
Ernie Dawson has
undoubtedly gained by
his publication. It is
truly marvellous how he
managed to collect
such a mass of information,
during a period when he
was battling incessantly
to keep up with the
surveys in parties. I only

Hope that opportunity will
be given him to turn his
vast store of knowledge
to account in a country
which ^{will} yield good results
to his indefatigable
researches.

Wherever

Remain truly yours

J. Adams.

Dear Margaret,

As you are
referred to in the letter
I send it to you before
January 1st & George. All
my companions on the
Army write on similar
terms. M.D.
