J W Dawson Esq L L D
Montreal

Dear Sir

Last week I found an old letter of yours to me asking me to get you some specimens of "Soyon" in Myces, and knowing that you have lately issued a book on this subject which I have not yet had the pleasure of seeing, I assume you will pardon me writing you on the subject. - I have just returned here after an absence of some years and when out collecting for the Advisory Board of Ontario's

on Saturday, took the opportunity
of visiting the "Bogwon" locality
and got some very fine
specimens, which I shall
be most happy to send to you
should you desire them. -

I would also add that I am
satisfied the mode of its
occurrence, ^{with this place} as given in the
journal of Cuvier for 1863 is
not correct, but if spared
the oblige will make a thorough
examination & let you know
result. - If Mr. Price College
will from time to time accept
any good Mineral Specimens
I will be happy to give any
that I may be able to get
Yours truly
W. Morris
