

Williams

Fallowfield Dec 11/75

My dear Dr Dawson

Of course you will find all the shorter notices of the papers about which you ask in the Comptes Rendus - The more elaborate memoirs - are -

1. - Etude de Sigillaria Spruulosa
par M M. B. Renault & Grand'Eury
Memoires presents à l'Academie des Sciences
Tome XXII No 9
- 2 Recherches sur l'organisation des
Sphenophyllum et des Annularia
par - M Renault
Annales des Sciences Naturelles Tome XVIII
- 3 Etude de quelques végétaux
silicifiés des environs d'Autun
Par M B. Renault
Lycopodiens, Anastroptens & Lycopodium
Annales des Sciences N. Tome XII

Etudes sur les graines fossiles
trouvées a l'état silicifié dans
le terrain houiller de St Etienne
Par M. A. Brougniat
Annales Des Sciences N. Toulouse XX

I think the above are the
principal memoirs respecting
which you want infor-
mation: By the way,
do you know Newberry
of the Ohio Survey? I very
much want Vol 1 part II -
being the Paleontological
portion of his Geological
report - since I see that
he describes a number

of seeds from his district
If you happen to know
him I wish you would
ask him to send me a
copy of his report. I have
no idea how or where
to catch him or I would
write to him myself.

I presume that by this
time you are all locked
up in snow and ice - and
keeping a sharp lookout
upon the colour of your
noses. Here the weather
is comparatively mild

we have just had a few days
of frost - both north &
south of us they are deep
in snow -

Wishing you and yours
the merriest and happiest
of Christmases

I am ever sincerely yours

W. C. Williamson.

M. Renault is now a permanent
officer under Brogniart in the
Jardin des Plantes.

You will find M. Grand Eury
at Rue de Paris - St Etienne.
