

Newburyport Dec 15th 1875

Dr Brown

My dear Sir,

I am in want of something on the Early History of Man to refute the extreme views of Lubbock, Quatrefages, Mcheller and others - I understand that you have published something later than your "Earth and Man" which I have read with interest and with profit.

Write you
oblye me by indicating the

little of any thing which you
may have published later than
the "Earth & Man," & where it can
be obtained. Also any other works
written from the same stand point,
which you can recommend as
authoritative. Have you any
confidence in Southall's work
(which we have just put into our
public library?)

I think I can ask this ~~favor~~
of you being an old pupil, who
have strayed into this part of the
"Lord's Vineyard," where I am
doing a good business -

Respectfully
E. P. Howard
