J W Dawson Esq LLD 175  
Montreal

Dear Sir

I have today sent you  
by express a box with  
Eozoon and one or two  
small pieces of the rocks  
in the vicinity. - I have sent  
two large pieces of Eozoon  
from the surface of the  
"vef" a bit of the felsitic  
limestone, I mentioned, and  
also a small piece of the  
Serpentine. - I also enclosed  
a piece of Sandstone with  
two fossils which I fancy  
to be "anemones"? and I would  
add that since I wrote last  
I have visited more than

a dozen Potsdam localities  
and can find none like  
this bed, which from its  
position I feel very doubtful  
about. - May it not also  
be Laurentian? I trust  
the specimens will reach  
you in good order and prove  
satisfactory. If not I will  
try and get better in the  
spring. - I have addressed  
box to you at Wolfe Island

Yours truly  
J. W. Dawson
