

Allis

Pittsford Vt Dec. 29th 1875

Prof J. W. Danson
Montreal,

Dear Sir,

Enclosed please find a view of part of a "clay cutting" at Wells River Vt., with a fragment in the foreground showing the curious folds caused by pressure.

Having never seen so good an instance of this "golding", which I first noticed some weeks ago, I mentioned the circumstance to Mr Clifford, and he took a number of views. I send this thinking it might be of some interest, and as a reminder that I have not forgotten the debt I owe you on account of the

package of fossils you
were so good as to send
me some time ago.

I had the pleasure of
meeting with your fellow-
citizen Walter Shanley some
weeks since. He thinks that
our geologists were somewhat
at fault in regard to the
rock forming the interior of
Hoosac Mountain.

I hope Canada will
let her light shine at our
Centennial Exposition, especially
in a geological direction.

Yours very Truly
Solon M. Ellis.
