Montreal.

March 24/76

My dear sir,

I beg to acknowledge
with thanks receipt of
yours of 1st inst, respecting
my paper on Lanthanum
Phosphates.

I have received Hahn's
paper, but have not yet
studied it. He seems,
like some of the rest,
& have had deficient
material, and no full
conception of the peculi-
arities of fertilization of
such things. I am

PS + I hope you
will not ever
suffer it a violation
of copyright,
I repeat
the

Glad you are putting it
into the Annuals; and
hope you will allow
some of the rest of
us to make it a
text to preach
upon. The evidence of
large and varied life
in the Laurentian is
I think growing day by
day.

My object in writing
now is that of asking
you, if you know Baker's

translation
of it, if
print your views
translation with notes
& comments. W.B.

If you could
to confer it
to its value would
be greatly increased
W.B.

precise address, to send
him a copy of my paper
on Evolution, with my com-
ments, and also to
write his address in the
enclosed and ^{to my publishers,} mail it.
He seems an industrious
fellow, and of correct
& a better state of mind,
might do some good.

Yours truly
W. Dawson
