Principal J. W. Dawson

My dear Sir

Thank you for your
kind words in regard to
our report. From no source
could judgement come
out more weight, or be
more valued.

I hasten to reply to your
letter in order to open
communication between Dr.
Chas Romerger Halleck and
- as far as there is one -

of Ellicott - Perhaps
you met him at Detroit
He is just now publishing
a volume on the fossil
Corals of Ellicott -
I don't know him thoroughly
and well they will be
washed up, but the
descriptions will be illustrated
by most beautiful plates
photographs taken by D. R.

I have had considerable
distrust of the thoroughness
of Prof. Nicholson's work
He goes over a great deal
of ground in very little time

Perhaps he does not study a greater
quantity of subjects than you and do
not he certainly not faster than it
and if he has done full justice to the
very highest subjects of our French course
I must confess that he has some ability
I am glad to know that you are

again at work on our French course, and
I wish to express to you some specimens
I have taken from the course in French
You will observe by the way that
of you must take them

My sheets of Diphtheria are directed
in 1836 - I don't of them are more than
two of them, but that there are two.

(D. Laticus & D. Confusoria) Lebray on 183

III. Part I & Confusoria the Feet

Allegory is in Philosophia. and
The Form here in his volume the
with. In your hands. but by Contract

Yours
D. J. Moxley
