SHEET NO. _____

Jersey City, N. J., July 18th 1895

Sir, J. William Dawson
Little Mitis P.Q.

Dear Sir

Your favor of 7th inst
inquiring concerning the specimen
from So. Joggins, with double series of
foot prints and intertwining tail mark,
came during my absence in Montreal
You will, no doubt, obtain better
results by having the shale itself to
work upon, and I will take pleasure
in sending it to you at an early opportunity.

Would you prefer to have it with you this
Summer, or to have it sent to your Montreal
address for use when you return to your
study. I shall probably go to Joggins within
the next month and shall also be in
Montreal so that I can readily send to
either address. If you find that this
represents a new species I would prefer

that it remains with your collection
of Joggins specimens. If however it is as
I had supposed one of the species already
recorded by you, it will not be especially
valued by you, and I would be glad to
have it returned to me at Joggins Mines

Very sincerely yours

A. D. Torrey

that it contains most of our collection
of Jaggia specimens. If however it is
I had supposed one of the species already
described by you, and should be glad to
submit to you, and should be glad to
have it returned to me at Jaggia
I am very much obliged to you
Yours very truly
A. S. Murray
